WELCOME FROM DEAN DRUCKER

Today's headlines proclaim the present wide variety of job opportunities for engineers and a severe shortage of engineering graduates by 1976. They provide an appropriate backdrop for our display to you of the latest developments in engineering research and education and their relevance to you. We are proud to have this opportunity to show you what the College of Engineering at the University of Illinois at Urbana-Champaign means to the people of the state. The students and the staff have been working together for the past year to make your visit here both pleasant and rewarding.

All of us extend to you a very warm personal welcome to Engineering Open House, March 16 and 17, 1973, continuing a tradition which dates back to 1906.
